# Introduction through to conclusion:

- FileTek
  - long history, and in use for HSM at sites like UK Met Office
- Acquired by SGI
- Product for analysing filesystem contents
- Produces results on size distribution, etc:
  - similar to figures I presented at eResearch 2013
- Downloaded software, install on PC
- Used SAMBA export of our /datastore filesystem to look at my \$HOME directory
- 17,600 files – ran in under a minute

# Thank you
