 - Al Davis, NUS
 - Jeremie Ryan, WETA NZ
 - David Honey, SGI NZ

Housekeeping

- Safety briefing
- Facilities
- Breaks and lunch
- Dinner

3 | Off-site storage | Robert C. Bell

Data Migration Facility – why a User Group?

- Started in 2009
- Realisation that there was value in sharing knowledge and experience in managing large-scale data stores using DMF
- Worry about sites losing data! Still a worry!
“If you’re not worried, you’re not taking it seriously!”
- Access to information from SGI
- Opportunity to influence directions for DMF:
 - site wish lists – have seen results of this
