

Voting for DMF Users Group Wish-List – 2012

Rank	Feature	# Votes	# Points	Preferences (1 – 10)					
				CESNET	CSIRO ASC	DNRM	JCU	NASA Ames	Weta FX
1	33 Reprioritise/cancel requests	4	39	1	2	1			1
2	36 Specify VG for dmget & dmmove	4	25			2	4	5	8
3	45 Migrations should not block recalls from same tape	4	25	10		3	3		3
4	04 Filenames in database/PIP	2	17		1				4
5	49 Database to record contents of dump tapes	2	16	5			1		
6	08 dmmove chunks	2	15					1	6
7	07 Chunk flawing	2	14		3				5
8	24 Accept "find -print0" output	2	14		6				2
9	25 dmpub by non-owners	2	14		5			3	
10	34 VOL DB text field for sites	2	12			8		2	
11	40 Control over dmmove's internal dmdidle	2	10		8	4			
12	37 Space quotas	1	9	2					
13	54 Non-DMF use of VOL database	1	9				2		
14	56 Guide to troubleshooting common problems	3	9	9		9	6		
15	09 Recall load balancing	2	8		4				10
16	48 Better way to exclude files from xfsdump	1	8	3					
17	11 Specify drive for dmatsnf	1	7					4	
18	22 Migrate/recall files as a group	2	7		10	5			
19	52 Better logging of backups	1	7	4					
20	41 Release mechanism for DMF updates	2	6			7			9
21	55 Documentation of regular administrator tasks	1	6				5		
22	23 Recursive dmget/dmput	1	5			6			
23	43 DUMP_MIGRATE_FIRST should honour policies	1	5	6					
24	12 Prioritise requests by type	1	4		7				
25	17 Large numbers of inodes	1	4						7
26	51 Better management of a tape pool by do_xfsdump	1	4	7					
27	38 readline in dm*adm	1	3	8					
28	13 Round robin explicit recalls	1	2		9				
29	42 Simplify DMF package structure	1	1			10			
30	01 Upward movement to DCM	0	0						
31	03 Clear queued merges	0	0						
32	14 dmmove speedup	0	0						
33	15 More threads inside DMF	0	0						
34	16 Large numbers of hard links	0	0						
35	19 Performance statistics	0	0						
36	20 Immediate refresh for dmstat	0	0						
37	26 State of files while recalling regions	0	0						
38	27 File state passed through NFS	0	0						
39	28 DMF clients to support CIFS	0	0						
40	29 tmstat equivalent for OV	0	0						
41	30 tmfrls equivalent for OV	0	0						
42	32 Man page improvements for OV	0	0						
43	35 Prevent HLOCK being cleared on restart	0	0						
44	39 Change dmmove command line	0	0						
45	44 dmpub -r should honour policies	0	0						
46	46 DMF-aware Apache	0	0						
47	47 Dual robots in Spectra T-finity library	0	0						
48	50 Backup only inodes even if the files are REG	0	0						
49	53 xfsdump should not ignore files in MIG state	0	0						

Preferential system: 10 points for 1st choice, 9 for 2nd, 8 for 3rd, etc.

Graph is only valid when the table is properly sorted by number of points (descending)!
